Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, Figs. 1-5 in the reply filed on 16 January 2007 is acknowledged. Claims 17-30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 10-14 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Gebrauchsmuster '991.7. Gebrauchsmuster '991.7 discloses a container formed by a tube 1 and an end cap 2. The tube includes mounting openings 10 receiving projections 6 releasably securing the end cap to the tube. With respect to claim 12, note is made that the end cap includes a "handle" 9 capable of facilitating engagement by the hand to rotate the end cap, if desired.

4. Claims 1-4, 10, 11, 14 and 34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the "LCR" Dice Game photographs.

5. Claims 1-3, 10, 11, 14 and 34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Vajtay (fig. 4 emb).

6. Claims 1-11, 14 and 34-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Nowotny et al. Nowotny et al discloses a container including a tube 10 with mounting openings

20 and an end cap 12 including projections 26-29. With respect to claim 5, note is made of the figs. 5 and 6 embodiment. With respect to claim 9, no distinction is seen between the claimed container and that shown in the figs. 5 and 6 embodiment, i.e. the side angled or ramped portion of each projection is considered deflectable to some degree when rotated during removal.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over any one of Gebrauchsmuster '991.7, the "LCR" Dice Game photographs, Vajtay or Nowotny et al. Each of Gebrauchsmuster '991.7, the "LCR" Dice Game photographs, Vajtay and Nowotny et al discloses all structure of the claimed container except formation of the body with an inner diameter from about 2 inches to about 7 inches (cl. 15) or with a wall thickness between about .05 inches to about .25 inches. With respect to claim 15, it would have been obvious to make the inner diameter of the tube in any one of Gebrauchsmuster '991.7, the "LCR" Dice Game photographs, Vajtay or Nowotny et al with a diameter between about 2 to about 7 inches as a mere selection of what size container is desired to hold a given size of contents. The ability to size a container to hold a given size of content is within the level of skill in this art. No patentable distinction is seen in the selection of the claimed dimensions over any other common container size. With respect to claim 16, it would have been obvious to make the wall thickness of the container in any one of Gebrauchsmuster '991.7, the "LCR" Dice Game photographs,

Art Unit: 3782

Vajtay or Nowotny et al about .05 inches to about .25 inches as a mere selection of one common wall thickness over any other. The difference is seen as a mere change in the thickness/size of the walls relative to any other standard wall thicknesses for a tube.

Conclusion

The remaining cited prior art is illustrative of the general state of the art.

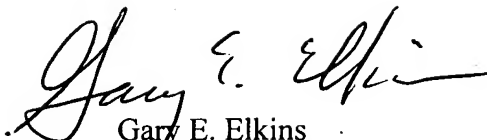

In order to reduce pendency and avoid potential delays, Technology Center 3700 is encouraging FAXing of responses in Office Actions to (571)273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by Applicants who authorize charges to a PTO deposit account.
